

# Green Earth Sub instructions

## step 1

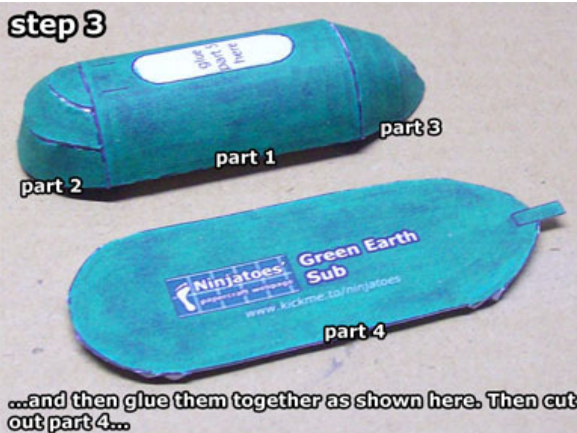

Other than the parts (preferably printed on thicker paper), all you really need to build your own papercraft Green Earth Sub is glue, a sharp knife, a rubber cutting mat and maybe a toothpick to make it easier pre-shaping the smaller parts.

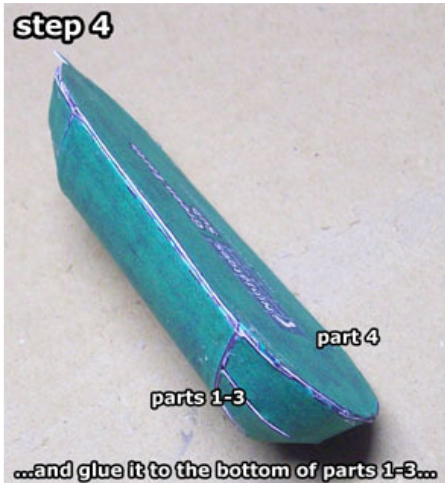

## step 2

## step 3

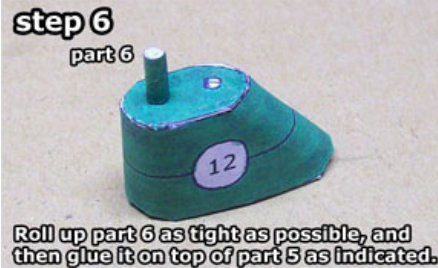

## step 4

## step 5

## step 6

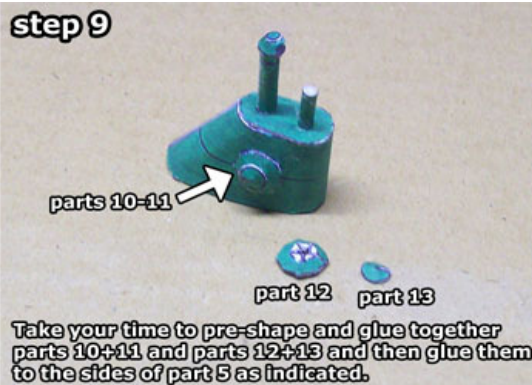

## step 7

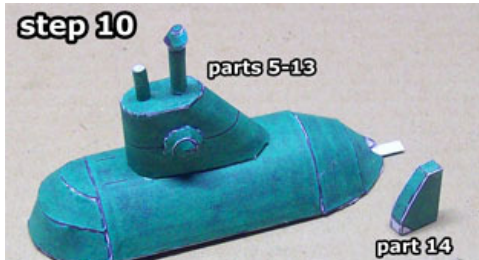

## step 8

## step 9

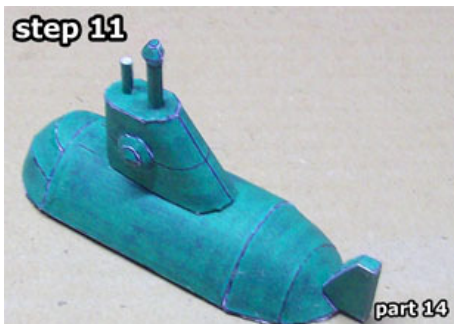

### step 10

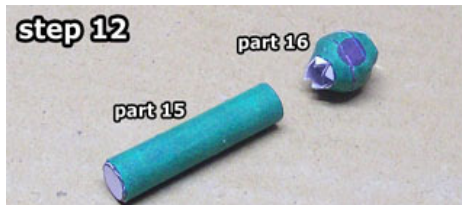

Glue parts 5-13 on top of the hull as shown here. Cut out and assemble part 14...

### step 11

...and then glue it to the back of the Sub.

### step 12

For the submerged version, take your time to pre-shape and assemble parts 15 and 16...

### step 13

...and then glue them together. The periscope should be able to stand on its own, but you can glue it to part 16 for better balance if you want to.

### step 14

Thank you for building a Ninjatoes papercraft model!
